

Key Sections and Articles № 1 (42) 2014

WITH A FOCUS ON: Primary Packaging for Liquid Dosage Forms	
16	With a Focus on Pharmaceuticals
18	New Pharmaceuticals Packages Protect Proteins and Prevent Falsification
22	Glass Syringes – Still Indispensable to Injectable Drug Delivery?
26	Minimized Delamination Risks. <i>By Dr. Bernhard Hladik</i>
28	Prefilled Syringes – System Application for Safe and Successful Medicines Adoption to Pharmaceutical Market. <i>By Veronika Krehan</i>
30	The Best of Two Worlds
34	Innovative Delivery Systems: Rise in Chronic Conditions Calls for New Packaging to Ensure Home Compliance. <i>By Bart Burgess</i> As therapies target specialized disease areas, at-home delivery of these therapies designed with patients in mind will help to ensure compliance while offering pharmaceutical manufacturers the opportunity to differentiate their products.
38	SECUREJECT®: New Approach to Prefilled Syringes. <i>By Rajeev Kabbur</i>
40	WEGO – the Largest Prefilled Syringes Producer in Asia
44	Description of the Process of Sterile Medicines Filling in Preliminary Sterilized Syringes. <i>By Nikolay Kodryanu</i>
50	ROTA Verpackungstechnik GmbH & Co. KG
52	Ampoule Processing
54	Fast and Safe. groninger Implements a Comprehensive Concept for Processing Nested Prefilled Syringes
56	System Solution for Syringes and Vials
60	Focus: API and Excipients
60	Implementing Health- and Science-Based Risk Assessment for Multi-Product Manufacturing. <i>By Dr. Mark Carver</i>
68	Ludiflesh® Application in Manufacturing of Orally Dispersible Acetaminophen Granule Using Compacting. <i>By T. Agnese, T. Cech, M. G. Herting</i>
72	Quick Desintegration – Challenge for Formulation. <i>By Dr. Tobias Hess, Anton Morozov</i>

FEATURES	
82	Analytical Control: With a Focus on UHPLC Systems and Columns
91	Automated System TOX.I.S.™ for Human Biological Liquids Analysis Based on SHIMADZU Liquid Chromatograph. <i>By Aleksandr Sukhomlinov</i>
94	New Mass-Detector QDa from Waters. <i>By Aleksey Svidro</i>
96	UHPLC Chromatography with Super Critical Fluids – Effective Method for Separation of Structurally Close Compounds. <i>By O. I. Pokrovskiy</i>
106	Marketing Ukrainian Pharma Market in 2013. <i>By Irina Gorlova</i>
