

Summary

Pharmaceutical Industry Review is participating in AICHEMA, June 2012, Frankfurt-am-Main, as an exhibitor and media partner. Some of the articles and subjects of this Pharmaceutical Industry Review publication (#3 (32) 2012) are related to events of AICHEMA 2012 exhibition.

In its introductory **CIS Markets section**, Pharmaceutical Industry Review provides an expert view on pharma markets in the countries of CIS region (Armenia, Azerbaijan, Byelorussia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russian Federation, Ukraine and Uzbekistan). In 2011, majority of pharma markets in the CIS countries posted positive growth dynamics. Local manufacturers in the above countries are actively enhancing their production capabilities with a view to comply with GMP EU standards. In these pharma markets, competitiveness of suppliers will be determined by their product quality conforming to international standards as well as affordability of their products.

In particular, for AICHEMA 2012 convention, the **Pharma Company section** included profiles of variety of leading pharma corporate's from the region, such as Arterium

Corporation, Biopharma, Darnitsa, Farmak, InterChem, Lekhim Group, Pharmex Group, Yuriya Pharm (Ukraine), Geropharm, Polysan, Rafarma, STADA CIS Holding (Russian Federation), and presentation of the pharma regulation authority in Ukraine.

The **Equipment section** of this publication presents a wide range of companies participating in AICHEMA 2012. I Holland Company describes its special PharmaCote RS coating for die molding equipment. Sartorius explains how merger of Biohit liquid handling business will enhance its range of products for bio- and laboratory technologies. Optima describes its high-tech turnkey projects for pharma in the area of drying (lyophilisation), filling and packaging processes. Rommelag company presents its Bottelpack blow-fill-seal technology for pharma. Schubert firm invites to visit its exhibition at AICHEMA 2012 showing TLM flexible packaging line. ITALVACUUM, one of leading suppliers of vacuum dryers and vacuum pumps elaborates on unique features of its self-designed innovative equipment with a broad range of applications in pharma. Groninger, a machine-building firm from Germany, describes its

exposition at AICHEMA 2012 with a focus on technology innovations for filling and sealing of pharma and cosmetic products.

SCHOTT Pharmaceutical Packaging tells about its innovative solutions in packaging for implementing strategy Pharma 2020 in Russian Federation.

The **Biotechnology section** included two articles: 1) on R&D in biopharma sector in Ukraine, and 2) future of downstream processing – both presenting professional views on the current status of the problem and the nearest future prospectives.

The **Events** section covers the 18th Russian Pharmaceutical Forum and 1st Healthcare and Medical Device conference, both organised by Adam Smith Institute (Saint-Petersburg, May 2012). As well, the details of two specialised seminars are included: 1) on excipients for solid dosage forms (provided by IMCD), and 2) on key equipment for production, packaging and inspection of modern infusion and injection forms (provided by Technocom Engineering). ■
